

SAN ISABEL TELECOM, INC.
TTY REPORT
July 15, 2002

1. Network infrastructure software development

San Isabel Telecom, Inc. ("San Isabel") utilizes Lucent Technologies switch to provide CDMA digital wireless services throughout its market. San Isabel understands that Lucent Technologies has completed its development of software and product tests to enable carriers using Nortel equipment to comply with the Commission's TTY requirements.

2. Handset development and testing plans

San Isabel must rely on vendors of handsets used by its customers to develop TTY capability within those handsets. San Isabel is aware that Motorola and Sony Ericsson have tested handsets on Lucent CDMA infrastructure equipment (see April 12, 2002 report filed by TTY Forum). Sony Ericsson reported that it has been unable to produce valid test results since February 2002 on Lucent infrastructure.

3. Beta testing and lab testing

San Isabel must rely on Lucent Technologies and handset vendors for initial conformance testing.

4. Release and general availability to carriers of network infrastructure software

San Isabel understands that Lucent Technologies' TTY software generic is commercially available.

5. Availability to carriers to full acceptance test units

San Isabel understands that Lucent Technologies has completed testing of its TTY solution.

6. Efforts toward achieving digital wireless solution capability with enhanced TTY devices

San Isabel understands that the TTY software solution commercially available at this time addresses Baudot type messages only. Other capabilities may be included later, after standards are adopted.

7. Carrier coordination of testing with PSAP

See response to item 2 above.

8. Carrier testing activities, including field testing, consumer end-to-end testing, and other necessary tests

San Isabel understands that the Lucent Technologies software generic necessary to comply with the Commission's TTY requirements is release 16. San Isabel has completed installation and testing of the Lucent Technologies release 16 and has also installed release 17.

9. Retail availability of necessary consumer equipment.

San Isabel is aware that Motorola and Sony Ericsson have tested handsets on Lucent CDMA infrastructure equipment (see April 12, 2002 report filed by TTY Forum). Sony Ericsson reported that it has been unable to produce valid test results since February 2002 on Lucent infrastructure.

10. Geographic scope of network infrastructure deployment

San Isabel provides service to the Montrose, Ouray, Delta and San Miguel counties in BTA 168.

Respectfully Submitted,
